

EDUCATION**Indian School of Business** | Post Graduate Programme in Management

2025 – 2027

Delhi Technological University (DTU) | India | Bachelor of Technology

Jul 2017 – Aug 2021

WORK EXPERIENCE**ION Trading | Product Manager, XTP Fees Module****Mar 2025 – Mar 2026****Key Achievements**

- Handpicked by senior leadership to transition from Software Engineering into Product Management — appointed as 1 of 2 PMs across ION's 500+ employee capital markets division; assumed full ownership of the XTP Fees APAC portfolio (~\$2M ARR) across Tier-1 banks, brokers, and FCMs, owning roadmap prioritization across 250+ backlog items and cross-functional execution across 3 engineering teams, UI/UX, DevOps, and Implementation
- Drove end-to-end discovery-to-design for 15+ enterprise features over 12 months, translating VP/C-suite requirements into 10+ BRDs, 8+ functional specifications, and 10+ wireframes/prototypes; delivered 100% of features to production, supporting a multi-million-dollar revenue pipeline

Enterprise Onboarding & Delivery

- Served as product and solution advisor for Citi APAC's strategic migration from FIS Global to XTP, architecting an API-first integration between Citi's middleware and XTP across 200K+ accounts and 1M+ daily trades; decomposed requirements into 10+ epics and 40+ user stories, cutting operational onboarding effort from 2 days to 4 hours (85% reduction)
- Selected by CTO and CPO to lead Citi APAC's production-readiness stabilization program, resolving 50+ critical escalations within a 4-week window across 25+ stakeholders to achieve 100% closure of go-live blocking issues

Regulatory & Product Strategy

- Launched Japanese Consumption Tax (JCT) capabilities and a multi-currency NFA fee framework across 4 NFA-regulated exchanges (CME, CBOT, NYMEX, COMEX), expanding XTP's regulatory footprint across APAC markets
- Designed an automated CME Group membership-resolution platform across 1.7M accounts, cutting fee-calculation errors from 20% to near zero; built a modular licensing/entitlement framework that expanded XTP Fees' addressable market by 200%+
- Served as functional SME for XTP Fees across APAC, training 20+ QA, Client Services, and Implementation professionals on product workflows and fee-calculation logic, cutting onboarding time for new team members by 60%

ION Trading | Software Developer, XTP Fees Module**Jun 2021 – Mar 2025****Key Achievements**

- Promoted to Senior Software Developer in 2 years vs. a 4-year norm, placing in the top 10% of peer progression; spearheaded a 4-year, end-to-end modernization of ION's 10+ year legacy Fees platform serving 25+ global banks, brokers, FCMs, and clearing firms
- Directed re-engineering of the platform from RMI/JSP to REST APIs, Spring, and Angular — migrating 50+ screens and 120+ configuration modules while maintaining 99.9% platform availability; cut processing time 6x (1.5 hrs to 15 min) and drove ~\$750K ARR uplift across 25 clients

Technical Leadership

- Directed a 5-member engineering team to build an enterprise-scale automated testing platform (Robot Framework, Jenkins CI/CD, Selenium), scaling code coverage from 55% to 90% and cutting production incidents 90%+ (15/week to ~1/week)
- Architected a cloud-native release platform (AWS, Docker, Jenkins, Nexus), cutting release lead time 75% (4 hrs to 1 hr) and manual deployment effort 80%
- Led a 5-member team to deliver a self-service reporting platform supporting EMIR/MiFID II regulatory obligations for 25 banks, brokers, and FCMs, cutting report-generation time from 30-40 min to under 5 min (85%+ reduction)

Client Impact

- Spearheaded a £100K+ paid engagement for Julius Baer, designing and delivering 4 REST APIs for real-time fee and commission data in 4 days
- Led post-LockBit cyberattack DevSecOps modernization within 1 week of incident impact, eliminating 100+ open-source dependencies — including 30+ critical/high-severity vulnerabilities — via automated security-gate enforcement

OTHER ACHIEVEMENTS

- Placed 3rd of 12 teams at ION's internal hackathon, building an automated compliance-monitoring solution
- Built a structured onboarding and mentorship pipeline achieving 100% PPO conversion (3/3 interns); helped launch the ION Wellness Program, an employee-engagement initiative spanning 1,000+ employees

SKILLS

- Product: Roadmap prioritization, discovery-to-design, BRDs & functional specs, sprint planning, cross-functional stakeholder management, licensing/pricing, packaging & monetization strategy | Technical: REST APIs, API contracts, Angular, Spring, AWS, Docker, Jenkins CI/CD, Robot Framework, Selenium | Domain: Capital markets, post-trade/clearing, regulatory reporting (EMIR, MiFID II, GST/VAT, JCT)
